About Us

Compliance Solutions Canada, a leader in providing Canadian business with compliant workplace solutions since 2008, now introduces a specialized website helping contractors to find the best and most cost-effective code compliant tactile solution for their projects. This new website is named **TactileSolution.ca**

By making use of our extensive knowledge of code compliance, this specialized site is **“Your Source for Code Compliant Solutions”**.

Our Mission is to provide our customers with accessibility solutions that meet all current federal and provincial standards. All products offered meet the most rigorous test requirements and comply with AODA, CSA, ISO, FADS and IFC standards to ensure you achieve the highest compliance in your projects.

Our Tactile Solutions are achieved by the most comprehensive offering of tactile walking surface indicators ranging from cast iron and stainless steel to various engineered polymers and an extensive range of photoluminescent (PLM) exit signs, stair nosing's and exit path marking.

When you need mandatory code compliant accessibility solutions for any project in Canada, look in our [featured solutions](#) or call us.
